REQUEST FOR RECTIFICATION UNDER PCT RULE 91.1(f)

Attn: I. Britel,
Authorized Officer

Sir or Madame:

REQUEST TO PUBLISH REQUEST FOR RECTIFICATION WITH APPLICATION

In response to the Invitation to Correct Defects dated 09 June 1994, applicant submitted 6 sheets of formal drawings. In the Form PCT/ISA/217 mailed 19 August 1994, the ISA/US responded by refusing entry of "rectified" sheets 1/6 - 3/6 of the drawings. As the ISA/US has characterized sheets 1/6 - 3/6 as a request for rectification of obvious errors, before the PCT Rule 91.1 (g^{ter}) deadline (of 18 months from the priority date) of 10 November 1994, applicant hereby requests that sheets 1/6 - 3/6 of the drawings filed with the RO/US on 09 June 1994 (enclosed) be published with the international application, along with the following remarks. It is requested that the following remarks also be considered as part of the request for rectification of obvious errors:

All the diagonal cross-hatching, and all the vertical hatching on the cross section of outer sheath 213 in new formal Fig. 2, match the corresponding hatching in original informal Fig. 2. Any other difference in hatching between

the two Figs. 2 is merely the result of the larger scale of new formal Fig. 2.

On new formal Fig. 2A the only hatching which does not match original the Fig. 2A hatching is downward left-to-right diagonal hatching which was originally shown as cross-hatching; however, the contrast, in new formal Fig. 2A, between the cross-hatching on knurled locking bolt 203 and the diagonally hatched area (to the right of connector 216 and below base 217) is correct because this area is shown in section, unlike bolt 203, in this Fig.

The addition of reference numeral 216 in new formal Fig. 2A is supported by the inclusion of the lead line for this numeral in original informal Fig. 2A and, in the description, at page 10, line 27 and page 11, line 20.

The addition of reference numeral 226 in new formal Fig. 2A is supported by the inclusion of the lead line for this numeral in original informal Fig. 2A and, in the description, twice, at page 11, line 10.

What little actual "shading" there is in new formal Fig. 3A corresponds to the shading in original informal Fig. 3A. The detail of the two Figs. 3A appears also to correspond. Moreover, the detail of new formal Fig. 3A also is true to the description of portions of antenna 300 included in pages 15, 16, 18 and 19. The ISA/US did not specify how the detail in Figs. 3A had changed.

The ISA/US did not object to new formal Figs. 1 and 3.

A check for USD \$85.94, which is the October 1994 equivalent of 110 Swiss francs, the fee for the three sheets of drawings and the two sheets of the above remarks, as well as for the one-page cover letter for the drawings originally submitted to the RO/US on 11 July 1994 in response to the Invitation to Correct Defects, is enclosed.

Respectfully submitted,

LOWE, PRICE, LEBLANC & BECKER

Sir or Madame:

RESPONSE TO INVITATION

In response to the Invitation dated 09 June 1994, applicant herewith submits the Power of Attorney, 6 sheets of formal drawings and new Sheet No. 3 of the Request Form.

Applicant believes that the enclosures meet all the requirements of the Invitation and that no further action is necessary.

Respectfully submitted,
